THE ANNALS OF APPLIED BIOLOGY

EDITED BY

W. B. BRIERLEY

AND

C. T. GIMINGHAM

VOLUME 29

CAMBRIDGE
AT THE UNIVERSITY PRESS
1942

PRINTED IN GREAT BRITAIN

CONTENTS

No. 1 (February 1942)

PAGE

1. The vernalization of tomato seed. By D. W. Goodall and B. D. Bolas . 1

2. Studies in bacteriosis. XXV. Studies on a bacterium associated with leafy-galls, fasciations and 'cauliflower' disease of various plants. Part IV. The inoculation of strawberry plants with *Bacterium fascians* (Tilford). By Margaret S. Lacey. (With Plate 1) 11

3. Presence of virus in the primordial meristem. By F. M. L. Sheffield, D.Sc. 16

4. Selection of bacterial food by soil flagellates and amoebae. By B. N. Singh . 18

5. The seasonal incidence, occurrence and distribution of protozoa in the bacteria bed process of sewage disposal. By A. Neville Barker, M.Sc. (With 1 Text-figure) 23

6. Preliminary investigations on the value of electric heating of beehives. By C. G. Butler and F. G. Cockbill 34

7. The grey field slug *Agriolimax agrestis* L., and its environment. By Robert Carrick, B.Sc., Ph.D. (With 4 Text-figures) 43

8. Baiting slugs using metaldehyde mixed with various substances. By H. F. Barnes and J. W. Weil. (With 6 Text-figures) 56

9. The problem of the evaluation of rotenone-containing plants. VI. The toxicity of *l*-elliptone and of poisons applied jointly, with further observations on the rotenone equivalent method of assessing the toxicity of derris root. By J. T. Martin, B.Sc., Ph.D. (With 2 Text-figures) 69

10. The analysis of toxicity tests on mixtures of poisons. By D. J. Finney. (With 1 Text-figure) 82

11. Transmission of potato virus *Y* by *Aphis rhamni* (Boyer). By B. Kassanis, Ph.D. 95

12. Reviews 96

No. 2 (May 1942)

1. The nutrition of spinach. By R. M. Woodman 97

2. The effectiveness of certain strains of the soya-bean nodule organism when associated with different varieties of the host plant. By J. Boyes and G. Bond . 103

3. Investigations on potato root eelworm, *Heterodera rostochiensis* Wollenweber. On the cyst population of a field over a series of years. By Herbert W. Miles, D.Sc., Ph.D. and Mary Miles, M.Sc. 109

4. Observations on the biology of the carrot fly (*Psila rosae* Fab.): assembling and oviposition. By F. T. Baker, F.R.E.S., I. E. Ketteringham, N.D.A., S. P. V. Bray, B.Sc. and J. H. White, B.Sc. (With 6 Text-figures) 115

PAGE

5. Studies on the mechanism of fungicidal action. II. Elements of the theory of variability. By A. F. PARKER-RHODES, B.A. 126

6. Studies on the mechanism of fungicidal action. III. Sulphur. By A. F. PARKER-RHODES, B.A. (With 2 Text-figures) 136

7. Proceedings of the Association of Applied Biologists: 10 October 1941. Symposium on wireworm investigations: Investigations on wireworms: introductory. By J. C. F. FRYER, M.A. Wireworms and crop production. By S. G. JARY, B.A. Statistical problems in field sampling for wireworms. By F. YATES, Sc.D., and D. J. FINNEY, M.A. (With 3 Text-figures.) Observations on some factors influencing growth in wireworms of the genus *Agriotes* Esch. By A. C. EVANS, PH.D., and H. C. GOUGH, PH.D. (With 4 Text-figures.) Wireworms and agriculture, with special reference to *Agriotes obscurus* L. By HERBERT W. MILES, D.SC., PH.D. Observations on the biology of *Agriotes obscurus* L. I. The adult insect. By MORRIS COHEN, M.SC., PH.D. (With 8 Text-figures) 144

8. Proceedings of the Association of Applied Biologists: 5 December 1941. A. Discussion on some problems in war-time horticulture with particular reference to vegetable production. Problems in vegetable production: introductory. By H. V. TAYLOR, D.SC. Some problems of the glasshouse industry in war time. By W. F. BEWLEY, C.B.E., D.SC. Some aspects of the nutrition of vegetable crops. By T. WALLACE, D.SC. The control of weeds in onions. By G. E. BLACKMAN, M.A. B. Some aspects of tree surgery in Canada. By CHESTER COOK 197

9. Report of the Council of the Association of Applied Biologists for the year 1941 209

10. Report of the Hon. Treasurer for the year ended 31 December 1941 . . 211

No. 3 (AUGUST 1942)

1. The nutrition of lettuce. By R. M. WOODMAN 213

2. Principal decays of British hardwoods. By K. ST G. CARTWRIGHT and W. P. K. FINDLAY. (With Plates 2–6) 219

3. *Cercosporella herpotrichoides* Fron., causing eyespot of wheat in Great Britain. By MARY D. GLYNNE. (With Plate 7) 254

4. The production of virus-free potatoes in the south-west of England. By JOHN CALDWELL 265

5. Symbiosis and siricid woodwasps. By E. A. PARKIN 268

6. Some notes on the biology of the click beetles *Agriotes obscurus* L. and *A. sputator* L. By H. C. GOUGH and A. C. EVANS 275

7. Laboratory and field experiments on the control of wireworms. By H. C. GOUGH 280

8. The quantitative interaction of spray fluid and active principle in determining the toxicity of a pyrethrum preparation to the argasid tick, *Ornithodorus moubata* Murray. By G. G. ROBINSON. (With 3 Text-figures) 290

9. The use of toxic polynitro derivatives in pest control. I. The estimation of dinitro-*o*-cresol and dinitro-*o*-*cyclo*hexylphenol. By R. L. WAIN 301

PAGE

10. Proceedings of the Association of Applied Biologists: 20 February 1942. Domestic entomology: I. New methods of controlling head and body lice. By J. R. Busvine. II. Experimental work on the transmission and development of scabies. By K. Mellanby. III. Some quantitative aspects of scabies parasitology. By C. G. Johnson. IV. The control of flies in town and country. By H. G. H. Kearns. V. Furniture beetles and other wood-borers. By R. C. Fisher. VI. Invasion of houses by ants and earwigs. By G. Fox Wilson 309

11. Proceedings of the Association of Applied Biologists: 17 April 1942. Morning session: Pathology of the hop. Hop downy mildew. By W. M. Ware, D.Sc. *Verticillium* wilt and virus diseases. By W. G. Keyworth, Ph.D. Some important pests of the hop. By A. M. Massee, D.Sc. Afternoon session: Interpretation of toxicity data. The significance of the bio-assay in studies of fungicidal action. By Hubert Martin, D.Sc. An improved method for the statistical analysis of fungicidal data. By A. F. Parker-Rhodes, Ph.D. The film technique of insecticide testing. By C. Potter, Ph.D. Examples of the planning and interpretation of toxicity tests. By D. J. Finney, D.Sc. 322

No. 4 (November 1942)

1. Factors inducing mineral-deficiency symptoms on the potato plant. By G. A. Cowie, M.A., B.Sc., Ph.D., F.I.C. (With 1 Text-figure) 333

2. The 'blotches' on leaves of Arran Pilot potatoes. By F. M. L. Sheffield, D.Sc. (With Plates 8 and 9) 341

3. *Verticillium* wilt of the hop (*Humulus lupulus*). By W. G. Keyworth. (With Plate 10 and 2 Text-figures) 346

4. Sugar-beet yellows virus. A preliminary account of experiments and observations on its effect in the field. By M. A. Watson. (With Plates 11 and 12) . . 358

5. A mosaic disease of broccoli. By John Caldwell and Ian W. Prentice. (With Plate 13) 366

6. The spread and effect of broccoli mosaic in the field. By John Caldwell and Ian W. Prentice. (With Plate 14 and 1 Text-figure) 374

7. Investigations on the biology and control of the carrot fly (*Psila rosae* F.). By F. R. Petherbridge, M.A., D. W. Wright, M.A. and P. G. Davies, M.Sc. (With 3 Text-figures) 380

8. *Crambus hortuellus* Hb. as a grassland pest. By H. W. Thompson, M.Sc. (With Plate 15) 393

9. Laboratory tests of bactericides on the plum and cherry bacterial canker organism (*Pseudomonas mors-prunorum* Wormald). I. The toxicity of some inorganic materials, especially copper compounds, and the effect of hydrogen ion concentration on the organism. By H. B. S. Montgomery and H. Shaw 399

10. Studies on the mechanism of fungicidal action. IV. Mercury. By A. F. Parker-Rhodes 404

11. Studies upon the copper fungicides. V. A critical examination of the fungicidal value of copper compounds. By H. Martin, R. L. Wain and E. H. Wilkinson. (With 2 Text-figures) 412

12. Association of Applied Biologists: Membership Notes 439

INDEX OF AUTHORS

PAGE

BAKER, F. T., KETTERINGHAM, I. E., BRAY, S. P. V. and WHITE, J. H. Observations on the biology of the carrot fly (*Psila rosae* Fab.): assembling and oviposition. (With 6 Text-figures) . . . 115

BARKER, A. NEVILLE. The seasonal incidence, occurrence and distribution of protozoa in the bacteria bed process of sewage disposal. (With 1 Text-figure) 23

BARNES, H. F. and WEIL, J. W. Baiting slugs using metaldehyde mixed with various substances. (With 6 Text-figures) 56

BEWLEY, W. F. Some problems of the glasshouse industry in war time 199

BLACKMAN, G. E. The control of weeds in onions 204

BOLAS, B. D. *See* Goodall, D. W. 1

BOND, G. *See* Boyes, J. 103

BOYES, J. and BOND, G. The effectiveness of certain strains of the soya-bean nodule organism when associated with different varieties of the host plant 103

BRAY, S. P. V. *See* Baker, F. T. *et al.* 115

BUSVINE, J. R. New methods of controlling head and body lice 309

BUTLER, C. G. and COCKBILL, G. F. Preliminary investigations on the value of electric heating of beehives 34

CALDWELL, JOHN. The production of virus-free potatoes in the south-west of England . . . 265

CALDWELL, J. and PRENTICE, I. W. A mosaic disease of broccoli. (With Plate 13) 366

—— —— The spread and effect of broccoli mosaic in the field. (With Plate 14 and 1 Text-figure) 374

CARRICK, ROBERT. The grey field slug *Agriolimax agrestis* L., and its environment. (With 4 Text-figures) 43

CARTWRIGHT, K. ST G. and FINDLAY, W. P. K. Principal decays of British hardwoods. (With Plates 2–6) 219

COCKBILL, G. F. *See* Butler, C. G. 34

COHEN, MORRIS. Observations on the biology of *Agriotes obscurus* L. I. The adult insect. (With 8 Text-figures) 181
